

THE MAINERO USA STORY

Skyview Equipment started a relationship with Mainero Manufacturing in an effort to find a corn header that would harvest 15- and 20-inch corn. Skyview Equipment has sold Mainero headers out of the two retail dealerships in Hiawatha, Kansas and St. Joseph, Missouri since 2014. During this time, Mainero has invested resources to develop a header that would work best for the US market, using feedback directly from us and visiting with U.S. growers each harvest. In 2021, Skyview Equipment in Hiawatha started warehousing and shipping Mainero parts to all of the US customers in an effort to provide better and faster support. In early 2023, the opportunity to become the exclusive U.S. distributor for all things Mainero came about so we started Skyview Distribution. We now operate under the name Mainero USA because we are the direct link to Mainero Manufacturing, providing equipment sales, parts & support specifically for U.S. equipment dealers and growers.
